# The CORE-motivation behind IFEES

“How can education in Science and Technology help to reduce poverty, to boost socio-economic development and to take the right decisions for a sustainable and environmentally compatible development ?”

**Claudio Borri,  
Founding President of IFEES**

A group of approximately 15 men in dark suits are seated around a long table covered with a red cloth. They are in a conference room with recessed ceiling lights and a patterned carpet. The men are looking towards the camera or slightly to the side, some with their hands clasped or resting on the table. A small blue flag is visible on the table to the right.
